

(Milford, CT) August 22, 2017

Eastern Computer Exchange, Inc. ('Eastern') is proud to announce that VMware has recognized the accomplishments of our virtualization architects within our Professional Services organization with the NSX vExpert Award. As NSX vExperts, they are acknowledged for their demonstrated expertise and significant contributions to the VMware user community around software defined networking and security. Our team of NSX experts are a vital component in Eastern's success in architecting and implementing successful solutions for our entire customer base.

"We are very proud to have members of our Professional Services Team recognized by VMware for excellence in their field," says Managing Director of Professional Services, Tony Valentino. "Eastern strives to recruit and develop top technical talent in order to provide a rewarding environment for our employees and exceptional service to our customers. This award reinforces the remarkable capabilities of our virtualization practice."

VMware NSX delivers the operational model of a virtual machine for the network. Leading enterprises use VMware NSX as an essential foundation of their cloud and software defined data center strategies to automate and secure their network to support both physical and virtual environments.

As a VMware Premier Partner, Eastern has designed and deployed some of the earliest and largest NSX implementations to date and we have the brightest Network (CCIE and VCIX-NV) level experts that deliver rapid, comprehensive and smooth project engagements.

Eastern Computer Exchange is a global solutions provider with over 27 years in the business, deploying some of the largest Dell EMC, Cisco and VMware solutions around Enterprise Hybrid Cloud, VMAX, Elastic Cloud, Isilon, ACI, Compute, Converged, Hyper-Converged and Backup & Recovery solutions in the world.

Eastern's specialty solutions include: Private/Public/Hybrid Cloud Strategy and Implementation, Cloud Management Platform Implementation, DevOps Strategy, Hyper-Converged Infrastructure Solutions, End User Compute Modernization Solutions (Mobility Management, Virtual Desktops, and Identity Management/SSO), Data Center Relocations & Migrations, Backup and Recovery/Archive.
